

Teal may be our colour, but this week we're going green

Conexus' North Albert Branch leading the way in solar energy

We're excited to announce our partnership with [Wascana Solar Co-operative](#) to install 115 solar panels on the roof of our North Albert Branch in Regina. This first-of-a-kind partnership will make this Conexus Branch the greenest financial institution in Saskatchewan.

"We're pleased to be teaming up with Wascana Solar Co-operative on this project," said Richard Corley, Vice President of Properties and Facilities at Conexus. "This project reinforces not only our commitment to Saskatchewan but also our desire for a sustainable energy future."

The solar panels will generate 41.9 kilowatts of electricity yearly – more than half of the power needed to keep the branch serving its members. Additionally, the solar installation will displace more than 20 tonnes of greenhouse gas emissions per year.

"This is Wascana Solar Co-operative's first large project," said Susan Birley, Vice President for Wascana Solar Co-operative. "Our vision is to build a sustainable, community-based co-operative acting as a catalyst for growth in solar power and we couldn't have asked for a better partner for our first project than Conexus."

Overseeing the installation of the solar panels is [miEnergy](#), a Saskatoon-based solar and geo-thermal company with over 19 years of experience in the renewable energy field and has worked with over 1500 clients across the Prairies.

The installation will be complete by the end of June and when operational, it will be the largest solar installation in Regina. To learn more about the project, visit www.wascanasolarco-op.com.

AT A GLANCE:

- Conexus' North Albert Branch goes green with the installation of 115 solar panels to its roof.
- Conexus is partnering with Wascana Solar Co-operative on this project. miEnergy is overseeing the installation of the solar panels.
- Install will be complete by the end of June and when operational, it will be the largest solar installation in Regina.
